Study ST-11: Paired blotter test, gulf panel, classic vs rose base

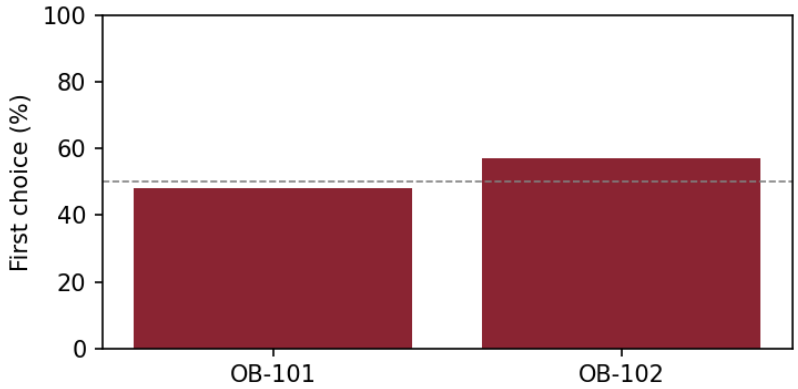
Fragrance R&D · 2025-09-30 · Classification: internal

Summary

Paired blotter test over two days with 36 testers at Panel A. Formula OB-102 (rose line, saffron absolute S-7 at 1.5 percent) was compared with OB-101 (classic oud, cardamom extract S-3).

Results

OB-102 reached 57 percent first choice against 48 percent for OB-101. The dwell ratio followed the same direction. Skin longevity scores were unchanged between the two formulas.



Formula composition

Material	OB-101	OB-102
Assam oud oil	28 %	-
Cambodian oud oil	-	27 %
Musk base	38 %	36 %
Amber accord	14 %	14 %
Bergamot oil	5 %	5 %
Sandalwood base	10 %	6 %
Labdanum absolute	-	6 %
Saffron absolute S-7	-	1.5 %
Cardamom extract S-3	2 %	-
Ambergris tincture	3 %	4.5 %

Recommendation

Recommendation: keep OB-102 as the reference for the rose line. The gain is attributed to saffron absolute S-7, not to the rose base itself. Repeat with S-7 on the classic base before any reformulation.

Notes

Limitation: single site, two-day exposure. Dilution in alcohol differed by 4 percent between the two samples.
