Study ST-14: Plantation oud acceptance after process change

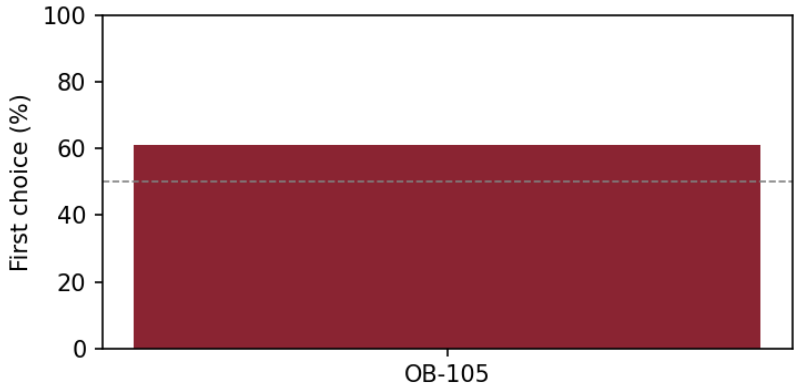
Sustainable Sourcing Programme · 2026-06-20 · Classification: restricted

Summary

Repeat of ST-13 after the process change. OB-105 was produced with a four-week maceration after blending. Formula percentages were unchanged. 32 testers at Panel A.

Results

OB-105 reached 61 percent first choice, up from 44 percent in ST-13. The harsh opening was no longer reported.



Formula composition

Material	OB-105
Synthetic oud accord	10 %
Plantation oud oil	22 %
Musk base	36 %
Amber accord	12 %
Bergamot oil	6 %
Sandalwood base	9 %
Cardamom extract S-3	2 %
Ambergris tincture	3 %

Recommendation

Recommendation: the maceration step, not the formula, drives acceptance of plantation oud. Approve OB-105 for a consumer wear test at home. Cost remains the open issue because plantation oud oil is the most expensive oud material in the portfolio.

Notes

Restricted: contains supplier pricing for plantation oud oil under negotiation.
